

Electricity

LC 1: Can I identify which common appliances run on electricity?

LC2: Can I identify where an electrical appliance gets its power?

LC3: Can I make electrical circuits?

LC4: Can I identify materials that are conductors and insulators?

LC5: Can I create my own switch?

LC6: Can I use alternative materials to create electronic circuits?

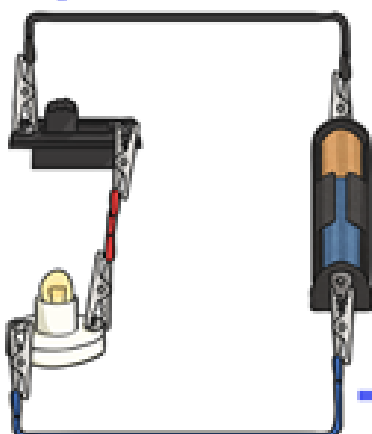

LC7: Can I identify the dangers of electricity?

LC8: Can I design an electronic game? (DT)

LC9: Can I write an explanation text to explain how my game works? (Literacy)

Homework : For our homework task this term, we would like to learn some life skills linked to electricity. With the help from an adult you could learn how to:

- change a light bulb
- change a fuse inside a plug
- change batteries

You could bring to school a set of written instructions with drawings of how to complete one of these tasks or share some photographs of you completing one of these tasks with an adult.
